

AGUNG SETIADI ANDARA

Information Systems Student | Data Analytics | Technology

PROFESSIONAL SUMMARY

Information Systems student with practical experience in data analytics, web development, and digital project development through internship and independent study programs. Experienced in developing dashboards, analyzing and visualizing data, and building web-based information systems. Proficient in Python, SQL, Excel, Tableau, Looker Studio, and Laravel. Interested in applying technology and data-driven solutions within industrial, energy, and offshore environments.

EDUCATION

Universitas Kuningan

Bachelor of Information Systems — Semester 7

PROFESSIONAL EXPERIENCE

Badan Pusat Statistik (BPS) Kabupaten Kuningan

Information Systems / Web Development Intern

- Developed and maintained **Teras Statistik / KUDAMAS**, a web-based platform for managing and documenting institutional activities.
- Implemented features including dashboard, activity management, document attachments, user roles, and account approval.
- Utilized **Laravel, PHP, database management, and web development tools**.

Independent Study Program — Data Analyst Division

Data Analyst Participant

- Worked on data analysis, data cleaning, exploratory data analysis, and data visualization projects.
- Developed interactive dashboards using **Python, Excel, Tableau, and Looker Studio**.
- Produced analytical reports, visualizations, presentations, and portfolio-based projects.

SELECTED PROJECTS

Offshore HSE & Corrective Action Performance Dashboard

- Developed an interactive dashboard for monitoring HSE incidents, severity levels, and corrective actions in an offshore environment.
- Applied data visualization and KPI monitoring to support safety performance analysis.

Teras Statistik / KUDAMAS

- Developed a web-based information system for managing and documenting institutional activities and statistical information.
- Built using Laravel with role-based access and activity management features.

Hospital Waiting Time Dashboard

- Analyzed patient waiting-time data and developed an interactive dashboard for monitoring service performance.
- Applied data cleaning, visualization, and KPI analysis.
